Education

B.Tech in Computer Science & Engineering (AI & ML) 2024 – 2028
ABES Engineering College, Ghaziabad *7.91/10*

Class 12th (CBSE) 2023
St. Xavier's School, Sammopur, Azamgarh, Uttar Pradesh *77%*

Class 10th (CBSE) 2021
St. Xavier's School, Sammopur, Azamgarh, Uttar Pradesh *84%*

Technical Skills

Programming: Python, Java, C++, C, SQL
Data Science: Pandas, NumPy, Matplotlib, Seaborn, Exploratory Data Analysis (EDA), Data Cleaning, Data Preprocessing
Machine Learning: Scikit-learn, Classification, Feature Engineering, Feature Encoding, Model Training, Model Evaluation, Cross-Validation
ML Algorithms: Logistic Regression, KNN, Naive Bayes, Decision Tree, SVM
Computer Vision: OpenCV, MediaPipe
Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Streamlit
Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Responsive Web Design

Internships

3Skill – Machine Learning Intern 2026
Python, Pandas, NumPy, Scikit-learn, Machine Learning

- Completed 3 industry-oriented ML projects, gaining hands-on experience in transforming raw datasets into trained and evaluated predictive models.
- Developed classification models for Wine Quality Prediction, AI-Based Hiring Prediction, and Fake Job Posting Detection, achieving 97%+ accuracy on selected models.
- Applied 4 machine learning algorithms—Logistic Regression, Decision Tree, Random Forest, and Naive Bayes—and evaluated performance using classification metrics.

Projects

Heart Disease Prediction System 2026

Python, Pandas, Scikit-learn, Streamlit

- Developed an end-to-end heart disease classification system using clinical and patient health features.
- Prepared clinical data by handling missing/invalid values, encoding categorical variables, and transforming features for model training
- Trained and compared 5 classification algorithms: Logistic Regression, KNN, Naive Bayes, Decision Tree, and SVM.
- Achieved 88.6% accuracy and a 0.89 F1-score using KNN as the best-performing model.
- Deployed an interactive Streamlit application for real-time heart disease risk predictions.

Eye-Controlled Cursor System 2025

Python, OpenCV, MediaPipe

- Engineered a real-time computer vision system for hands-free cursor control using Python, OpenCV, and MediaPipe.
- Implemented eye tracking to detect pupil movement and map gaze direction to mouse cursor actions.
- Integrated 3 core components—face and eye detection, gaze tracking, and cursor control—into a unified computer vision pipeline.

Titanic Survival Prediction 2026

Python, Pandas, Scikit-learn

- Analyzed survival patterns across 891 passenger records and transformed categorical passenger attributes into model-ready features.
- Evaluated 5 classification algorithms: Logistic Regression, KNN, Naive Bayes, Decision Tree, and SVM.
- Assessed model performance using 4 evaluation techniques: accuracy, confusion matrix, classification report, and cross-validation.

Certificates

- Machine Learning for Engineering and Science Applications – NPTEL Jan–Apr 2026
- Google Generative AI Foundations & Antigravity Workshop – SmartBridge May 26–29, 2026
  Generative AI, Prompt Design in Vertex AI, and Google Antigravity
- Exploratory Data Analysis – IT-ITeS SSC, Nasscom Oct 10, 2026

Extracurricular

Campus Ambassador, BECon'26 – Entrepreneurship Development Cell, IIT Delhi 15th Dec–2nd Feb 2026

- Promoted BECon'26 among students through outreach and awareness activities.
- Supported event communication and encouraged student participation.

Member, HUHC (Help Us to Help the Child) Club

- Actively involved in social initiatives focused on child welfare and support.
- Participated in awareness activities and community engagement programs.
